## 廃プラスチック環境排出低減を推進する国際的アライアンス 「Alliance to End Plastic Waste」に参加

住友化学は、このたび、環境中の特に海洋における廃プラスチック問題を解決するための新たな国際的アライアンス「Alliance to End Plastic Waste」（以下、「AEPW」）に、設立メンバーとして参加いたします。

AEPWは、プラスチックの製造から廃棄物処理に至るまでの製品ライフサイクルに携わるグローバルな企業からなるNPOで、1月16日に発足しました。発足時点で、欧米、東南アジア、アフリカ、中東地域から約30社が参加しています。AEPWは、現代社会のさまざまな場面において有用な材料であるプラスチックについて、環境への排出の抑制・防止を推進するため、「持続可能な開発のための世界経済人会議（WBCSD）」\*などとも連携しながら、今後5年間で、総額15億米ドルを投資し、主に4つの取り組みを推進する計画です。

### <AEPWが掲げる4つの取り組み>

- ・ 廃プラスチックを適切に管理し、リサイクルを促進するための基盤構築
- ・ プラスチックのリサイクルや再資源化を容易にし、使用済みプラスチックから価値を生み出す新技術の開発
- ・ 政府機関、企業、地域社会が廃プラスチック問題に取り組むための教育と対話の実施
- ・ 河川など廃プラスチックが蓄積し、陸上から海洋に流出する場所の浄化

住友化学は、廃プラスチックによる環境リスクの増大を社会が直面する重要課題の一つと捉え、これまでに、国内では「海洋プラスチック問題対応協議会」に、また、海外では「国際化学工業協会協議会」が推進する関連活動に参加してきました。今般、AEPWに参画することで、志を共にする参加企業と協力し、廃プラスチック問題への対応を一層加速させていく考えです。

住友化学は、「事業活動を通じて人類社会の発展に貢献する」ことを経営理念に掲げています。これからも、革新的な技術・製品の創出による社会課題の解決に積極的に取り組んでまいります。

\*持続可能な開発を目指す企業約200社のCEO連合体

## **New global alliance commits over \$1.0 billion USD to help end plastic waste in the environment; sets goal of investing \$1.5 billion USD**

JANUARY 16, 2019 – An alliance of global companies from the plastics and consumer goods value chain today launched a new organization to advance solutions to eliminate plastic waste in the environment, especially in the ocean.

The cross value chain Alliance to End Plastic Waste (AEPW), currently made up of nearly thirty member companies, has committed over \$1.0 billion with the goal of investing \$1.5 billion over the next five years to help end plastic waste in the environment. The Alliance will develop and bring to scale solutions that will minimize and manage plastic waste and promote solutions for used plastics by helping to enable a circular economy. The Alliance membership represents global companies and located throughout North and South America, Europe, Asia, Southeast Asia, Africa, and the Middle East.

“Everyone agrees that plastic waste does not belong in our oceans or anywhere in the environment. This is a complex and serious global challenge that calls for swift action and strong leadership. This new alliance is the most comprehensive effort to date to end plastic waste in the environment,” said David Taylor, Chairman of the Board, President and CEO of Procter & Gamble, and chairman of the AEPW. “I urge all companies, big and small and from all regions and sectors, to join us,” he added.

“History has shown us that collective action and partnerships between industry, governments and NGOs can deliver innovative solutions to a global challenge like this,” said Bob Patel, CEO of LyondellBasell, and a vice chairman of the AEPW. “The issue of plastic waste is seen and felt all over the world. It must be addressed and we believe the time for action is now.”

The Alliance is a not-for-profit organization that includes companies that make, use, sell, process, collect, and recycle plastics. This includes chemical and plastic manufacturers, consumer goods companies, retailers, converters, and waste management companies, also known as the plastics value chain. The Alliance has been working with the World Business Council for Sustainable Development as a

founding strategic partner. The Alliance today also announced an initial set of projects and collaborations that reflect a range of solutions to help end plastic waste:

- **Partnering with cities** to design integrated waste management systems in large urban areas where infrastructure is lacking, especially those along rivers which transport vast amounts of unmanaged plastic waste from land to the ocean. This work will include engaging local governments and stakeholders, and generate economically sustainable and replicable models that can be applied across multiple cities and regions. The Alliance will pursue partnerships with cities located in high plastic leakage areas. The Alliance will also be looking to collaborate with other programs working with cities, such as Project STOP, which is working in Indonesia.
- Funding The Incubator Network by **Circulate Capital** to develop and promote technologies, business models and entrepreneurs that prevent ocean plastic waste and improve waste management and recycling, with the intention of creating a pipeline of projects for investment, with an initial focus on Southeast Asia.
- Developing an open source, science-based **global information project** to support waste management projects globally with reliable data collection, metrics, standards, and methodologies to help governments, companies, and investors focus on and accelerate actions to stop plastic waste from entering the environment. The Alliance will explore opportunities to partner with leading academic institutions and other organizations already involved in similar types of data collection.
- Creating a capacity building collaboration with intergovernmental organizations such as the **United Nations** to conduct joint workshops and trainings for government officials and community-based leaders to help them identify and pursue the most effective and locally-relevant solutions in the highest priority areas.
- Supporting **Renew Oceans** to aid localized investment and engagement. The program is designed to capture plastic waste before it reaches the ocean from the ten major rivers shown to carry the vast majority of land-based waste to the ocean. The initial work will support the Renew Ganga project, which has also received support from the **National Geographic Society**.

In the months ahead, the Alliance will make additional investments and drive progress in four key areas:

- **Infrastructure development** to collect and manage waste and increase recycling;
- **Innovation** to advance and scale new technologies that make recycling and recovering plastics easier and create value from all post-use plastics;

- **Education and engagement** of governments, businesses, and communities to mobilize action; and,
- **Clean up** of concentrated areas of plastic waste already in the environment, particularly the major conduits of waste, like rivers, that carry land-based plastic waste to the sea.

“Success will require collaboration and coordinated efforts across many sectors – some that create near-term progress and others that require major investments with longer timelines. Addressing plastic waste in the environment and developing a circular economy of plastics requires the participation of everyone across the entire value chain and the long term commitment of businesses, governments, and communities. No one country, company or community can solve this on their own,” said Veolia CEO Antoine Frérot, a vice chairman of the AEPW.

Research from the Ocean Conservancy shows that nearly 80 percent of plastic waste in the ocean begins as litter on land, the vast majority of which travels to the sea by rivers. In fact one study estimates that over 90 percent of river borne plastic in the ocean comes from 10 major rivers around the world – eight in Asia, and two in Africa. Sixty percent of plastic waste in the ocean can be sourced to five countries in Southeast Asia.

“While our effort will be global, the Alliance can have the greatest impact on the problem by focusing on the parts of the world where the challenge is greatest; and by sharing solutions and best practices so that these efforts can be amplified and scaled-up around the world”, said Peter Bakker, President and CEO of World Business Council for Sustainable Development.

The following companies are the founding members of the Alliance: BASF, Berry Global, Braskem, Chevron Phillips Chemical Company LLC, Clariant, Covestro, Dow, DSM, ExxonMobil, Formosa Plastics Corporation, U.S.A., Henkel, LyondellBasell, Mitsubishi Chemical Holdings, Mitsui Chemicals, NOVA Chemicals, OxyChem, PolyOne, Procter & Gamble, Reliance Industries, SABIC, Sasol, SUEZ, Shell, SCG Chemicals, Sumitomo Chemical, Total, Veolia, and Versalis (Eni).

The live global internet broadcast can be viewed at [www.endplasticwaste.org/live](http://www.endplasticwaste.org/live). The broadcast will begin at 14.00 GMT and will last approximately 30 minutes.
