FUJIFILM Holdings' FY2030 greenhouse gas emission reduction target validated as "1.5°C goal" by the Science Based Targets (SBT) initiative

TOKYO, December 14, 2023 -- FUJIFILM Holdings Corporation (President and CEO, Representative Director: Teiichi Goto) announced that its greenhouse gas (GHG) emission reduction target for FY2030 has been validated by the Science Based Targets (SBT) initiative^{*1}, as a scientifically based target for achieving the "1.5 degrees Celsius goal"^{*2} set out in the Paris Agreement.

In 2017, Fujifilm Group drew up the Sustainable Value Plan 2030 (SVP2030), a CSR plan that approaches corporate social responsibility from solving social issues through business activities and taking environmental and social considerations into account in business processes. Under the SVP2030's priority issue of addressing climate change, the Fujifilm Group has revised its GHG emission reduction targets upward in 2021, and the SBT Initiative certified the revised targets.

■FUJIFILM Holdings' GHG emission reduction targets for FY2030

- Reduce GHG emissions across the entire product lifecycle^{*3} by 50% (compared to FY2019 levels)
- Reduce GHG emissions from its operations^{*4} by 50% (compared to FY2019 level)

Under the Green Value Climate Strategy for achieving goals set out in the SVP2030, the Fujifilm Group will promote production activities with a lower environmental impact and delivering products and services with excellent environmental performance in order to reduce GHG emissions.

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

*1 An international collaborative initiative of the CDP, the United Nations Global Compact, WRI (World Resources Institute) and WWF (World Wide Fund for Nature) that validates science based GHG emission reduction targets and promotes best practices in emission reduction activities.

*2 A goal to limit global warming to a maximum increase of 1.5°C above pre-industrial levels under the Paris Agreement

*3 Procurement of raw materials and manufacturing, transportation, use and disposal of products; More specifically, Scope 1 (direct emission from the company) + Scope 2 (indirect emission due to the use of electricity / steam supplied from other companies) as well as emissions arising from purchased products and services; fuel energy activities not included in Scopes 1 or 2; transportation and distribution (upstream), use of sold products and disposal of sold products

*4 Total of Scope 1 (direct emission from the company at the manufacturing stage of products) and Scope 2 (indirect emission due to the use of electricity / steam supplied from other companies)
